

Version 2.1

Akallan

Presentation

The SNT is a project that aims to create overlay textures that can then be used in the Lot Editor. The textures imitate as much as possible the road markings that can be found in Switzerland and the rest of Europe, which is why there are two different colors for pedestrian crossings in the textures: yellow for Switzerland and White for Europe. The aim of the SNT is ultimately to cover all road networks, be they those of Maxis or NAM, except the Maxis highway and NAM RHW.

A short introductory video is available on [YouTube](#).

Compatibility

The SNT is compatible with all versions of SimCity 4 (Vanilla / Rush Hour / Deluxe).

Installation

Installation

Unzip the .zip file and place it in the Plugins folder of SimCity 4.

Uninstalling

Simply delete files that have been placed in your Plugins folder. Attention, before deleting the files of the SNT, take care that no LOT contains the textures of the SNT otherwise you will have problems of displays of textures on these LOTS.

File paths

Users\Documents\Simcity 4\Plugins

Dependency

No dependency, the SNT is itself a dependency.

Notes

If you have problems, questions or suggestions to make, you can make your request on the topics of the SNT in the different forums:

[SimCity 4 Devotion](#) (EN)

[Simtropolis](#) (EN)

[ToutSimCities](#) (FR)

Copyright

The SNT is free to be shared on any site by third parties or to be modified, as long as the credit is present and refers to the name of Akallan.

SNT version

18.11.2018 - Version 1.0

Networks completed:

- *M01.01 (Ortho) / M01.02 (Ortho) / M02.01 (Ortho) / M02.02 (Ortho) / M03 (Ortho) / M04 (Ortho) / N05 (Ortho) / N08 (Ortho) / N10 (Ortho) / N14 (Ortho) / N15 (Ortho) / N19.02 (Ortho) / N19.07 (Ortho) / N19.08 (Ortho) / N19.11 (Ortho) / N21 (Ortho) / P23 (Ortho) / P24 (Ortho)*

Total textures:

- *4'175*

24.09.2019 - Version 2.0

Networks added to the previous version:

- *M01.01 (Diag) / M01.02 (Diag) / M02.01 (Diag) / M02.02 (Diag)*

The Texture ID of the turns has changed, it can create disturbances on the lots that use the old ID. This change affects the following networks:

- *M01.01 (Ortho) / M01.02 (Ortho) / M02.01 (Ortho) / M02.02 (Ortho) / N19.02 (Ortho) / N19.07 (Ortho) / N19.08 (Ortho) / N19.11 (Ortho)*

Total textures:

- *4'922 (+747 added to the previous version)*

15.08.2022 - Version 2.1

The installer has been replaced with a new process. Now it is a .zip file to unzip. This increases ease of use and access.
